

Strong business continuity plan

Strong business continuity plan

Ensure that you have a strong and clear business continuity plan to ready you in the event that there is a cyber attack to avoid disruption with minimal downtime.

Strong cybersecurity plan

Strong cybersecurity plan

A strong cybersecurity plan will reduce your exposure therefore reducing your risk.

Offsite Backups

Offsite Backups

Offsite backups are essential – should you lose the data you have in the cloud or on your business network, there will be a copy elsewhere that has not been compromised meaning you are ready recover your systems and data and get back to business.

Keep infrastructure up to date

Keep infrastructure up to date

Keeping your hardware and software up to date with the recent versions will mean there are less weak points for attackers to exploit.

Multifactor Authentication

Multifactor Authentication

Even if your password is compromised, Multi-Factor Authentication will continue to prevent the attacker from gaining access.
