Broadband**

Certified MSP Partner

250/250Mbps to 10/10Gbps Symmetrical Plans for Any Application

The demand for internet bandwidth is growing daily, with data-hungry apps, devices and new technologies slowing some connections to a crawl.

Our Business Internet service delivers you fast bandwidth with scalable plans from 250/250Mbps to 10/10Gbps to meet modern-day demands of your business connectivity requirements.

Whether it's for collaboration tools, CRM systems or conferencing software – get the speeds your business needs on our very own high-speed fibre network.

Fast, Resilient & Reliable Bandwidth on Our High-Speed Fibre Network

With businesses having almost total reliance on connectivity, it's essential to have bandwidth that delivers speed alongside a high level of resiliency.

That's why our Business Fibre Internet service offers committed bandwidth at an awesome 1:1 contention ratio on our high-speed fibre network – not 'best effort' or 'close to' speeds.

More reliable and predictable bandwidth enables your business processes to run more efficiently so your staff can be more productive (and less frustrated).

High-Speed Fibre Delivered with Enterprise-Level Features

Experience fast fibre internet loaded with enterprise-grade features:

-  250/250Mbps to 10/10Gbps Symmetrical Plans
-  99.95% Service Uptime
-  *0\$ Fibre Install to Eligible Sites Australia Wide
-  100% Australian-Based Support
-  Internet, Layer 2, MPLS or SD-WAN Configuration
-  Core Network Protection with Path Redundancy
-  IPv4 and IPv6 on Supported Hardware
-  Manage All Your Network Services via Carbon

99.95% Uptime with High Availability to Keep You Connected

Your business internet is only as good as the carrier network it's delivered on and the level of upstream redundancy in place for connection continuity.

At ONGC, we take Internet connectivity seriously, so we've heavily invested in our partnership with Aussie Broadband, leveraging their fibre infrastructure in the ground so you have access to enterprise connectivity with multiple path redundancy guaranteeing 99.95% uptime.

No more unreliable internet or worrying about potential downtime and its cost to your business – make the small investment now and connect your business with ONGC Fibre Internet.

Terms and Conditions. Available in select areas. Services cannot be used for bandwidth reselling. \$0 fibre build eligibility subject to a detailed site assessment. \$0 setup fee on a 36-month contract, fees apply to 12 and 24 month contracts. Actual throughput speeds may be impacted by hardware and other connecting infrastructure not owned by Aussie Broadband, such as customer premise equipment (CPE). Prices and products subject to change. T&Cs apply.

Dedicated Support from Australian Experts, 24/7 x 365 Days

We're not all about providing the best in business-grade internet on the fastest technologies available – we've also heavily invested in our partnership with Aussie Broadband to leverage their world class service offering to ensure you have the best experience possible.

Our 100% Australian-based local support teams and network engineers are located right here and ready to support your business.
